

How to reduce the impact of food waste ?

WHY TO COMPOST

Because the food we are wasting is going to be useful.

Our idea is to give the compost soil to farmers to allow them to reduce their use of chemical fertilizers and in that way your waste of food is more practical.

HOW YOU CAN SAVE MONEY USING COMPOST?

When a family waste food, instead of throwing it away, they make compost.

HOW SHOULD I DO THAT?

So you have to give the compost to the department of agriculture, and they will distribute it to the farmers, so in that way you are helping everyone.

WHICH BENEFIT DO I GET BY DOING COMPOST?

At the end of each month you need to give the compost to the farmers, and if you do that you get a 10% of discount in the products of the farmers. And if you make compost for 3 months in a row, you get a box of a product for free. In that way, you are helping the farmers with the sales and the crop, and also it will reduce the waste of food, while you are getting a benefit of it.

HOW MUCH FOOD IS WASTED?

SPAIN:

5.2kilos ->1 week

76kilos -> 1 year

POLAND:

1.04kilos -> 1 week

54kilos -> 1 year

FRANCE:

1.15kilos -> 1 week

60kilos -> 1 year

WHAT IMPROVEMENT DO WE GET?

The waste of food is going to be the same, but instead of be in the trash is going to be a compost, and that will help the environment.
