

# ERASMUS

TRIPS TO THE WARTA MOUTH AND  
THE BAT RESERVE

# THE WARTA MOUTH

In the national park there are many rare species such as:

- Corncrake, Scarlet Rosefinch, Crane
- Black-Tailed Godwit, Oystercatcher, Ruff

# ATTRACTIONS

- ▶ The first thing we did when we got there was watching a film about the birds in the park. After that we got the binoculars which helped us see the birds when we were walking in the park

# THE BAT RESERVE

- ▶ In the tunnels there are up to twelve different species.
  - ▶ Many of these bats are rare or endangered species such as the barbastelles and mouse-eared bat.
- 
- A decorative graphic consisting of several parallel white lines of varying lengths, slanted diagonally from the bottom right towards the top right, set against the blue background.

# ACTIVITIES

1. We went into a room in which the guide told us some information about the places we were going to visit

2. We went towards the tunnels while the guide told us more stories about the bunkers

3. We entered the tunnels and walked through them while having some stops.
